Opis treści CV

Design and maintenance of mechatronic systems and industrial robots.

Doświadczenie

01.09.2018 – Do teraz

Minsk State College of Electronics.
Head of Laboratory of Industrial Electronics
Developed several courses on PLC programming (Siemens PLC 1200, 1500), Robotics programming (CIROS 6, Mitsubishi RV-2SDB, RV-2AJ) and Industrial line assembly (Festo MPS), which resulted in changing the existing mechatronics course toward more PLC and robotics oriented, and expanding the list of possible job opportunities for students. ● Taught courses on Robotics Programming on customer demand. ● Did programming of Mitsubishi`s robots on customer demand. ● Programmed Human Machine Interfaces for industrial customers on demand. ● Put new equipment into operation, which expanded the list of taught specialties in the college. ● Participated in recruiting of students for college and their further development for the next WORLDSKILLS as a Judge.
