Opis treści CV

Design and maintenance of mechatronic systems and industrial robots.

Doświadczenie

01.09.2018 – Do teraz

Minsk State College of Electronics.

Head of Laboratory of Industrial Electronics

Developed several courses on PLC programming (Siemens PLC 1200, 1500), Robotics programming (CIROS 6, Mitsubishi RV-2SDB, RV-2AJ) and Industrial line assembly (Festo MPS), which resulted in changing the existing mechatronics course toward more PLC and robotics oriented, and expanding the list of possible job opportunities for students. • Taught courses on Robotics Programming on customer demand. • Did programming of Mitsubishi's robots on customer demand. • Programmed Human Machine Interfaces for industrial customers on demand. • Put new equipment into operation, which expanded the list of taught specialties in the college. • Participated in recruiting of students for college and their further development for the next WORLDSKILLS as a Judge.
